The applicant Lee Willis, hereby makes application for permission to change the Point of Diversion of water heretofore appropriated under Permit #57536

1. The source of water is underground
2. The amount of water to be changed .0062 CFS
3. The water to be used for Quasi-municipal purposes
4. The water heretofore permitted for Quasi-municipal purposes
5. The water is to be diverted at the following point within the SW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 5, T19S, R60E, MDM or at a point from which the center one-quarter (C $\frac{1}{4}$) corner of said section 5, T19S, R60E, MDM bears South 69° 50' 30" West a distance of 691.90 ft.
6. The existing permitted point of diversion is located within the SW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 5, T19S, R60E, MDM or at a point from which the center one-quarter (C $\frac{1}{4}$) corner of said Section 5, T19S, R60E, MDM bears South 08° 33' 21" West a distance of 334.52 ft. (The original map and application show this tie in the wrong direction i.e. North 08° 33' 21" East)
7. Proposed place of use S $\frac{1}{2}$ SW $\frac{1}{4}$ SW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 5, T19S, R60E, MDM
8. Existing place of use S $\frac{1}{2}$ SW $\frac{1}{4}$ SW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 5, T19S, R60E, MDM
Note; No change in the place of use
9. Use will be from January 1st to December 31st of each year.
10. Use was permitted from January 1st to December 31st of each year.
11. Description of proposed works well system is complete, including a totalizing meter. (steel cased well, submersible pump and storage tank)
12. Estimated cost of works \$
13. Estimated time required to construct works \$
14. Estimated time required to complete the application of water to beneficial use One Year

62904

15. Remarks: The reason for the point of diversion change is due to the fact that the well was not drilled in the correct location on the property, due to realignment of Section lines by the BLM. The existing well drilled and the well shown on the original map are over 300 ft. apart. There is no change in the place of use. This application is to bring all matters into compliance.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of the waters of an underground source as heretofore granted under Permit 57536 is issued subject to the terms and conditions imposed in said Permit 57536 and with the understanding that no other rights on the source will be affected by the change proposed herein.

This permit is issued subject to existing rights and is further subject to revocation if and when water can be furnished by an entity such as a water district or a municipality engaged in furnishing water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. It is understood that this right must allow for a reasonable lowering of the static water level. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The issuance of Permit 62904 corrects for a re-survey of section lines in this area by the Bureau of Land Management. Permit 62904 abrogates Permit 57536.

(CONTINUED ON PAGE 2)

(PERMIT TERMS CONTINUED)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.0062 cubic feet per second, but not to exceed 1.46 million gallons annually.

Work must be prosecuted with reasonable diligence and be completed on or before:

N/A

Proof of completion of work shall be filed before:

N/A

Application of water to beneficial use shall be filed on or before:

January 25, 1998

Proof of the application of water to beneficial use shall be filed on or before:

February 25, 1998

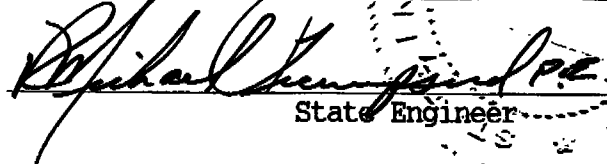

Map in support of proof of beneficial use shall be filed on or before:

N/A
